

Trans-Atlantic Counterparty Insolvency Energy Commodities Trading, Hedging & Marketing Climate Change

Troutman Sanders' attorneys have long-standing, global experience in the trading and marketing of all major energy and energy-linked commodities and products including their underlying markets and regulation, as well as the specific risks inherent in the purchase, sale, production and storage of such products.

Trans-Atlantic Counterparty Insolvency Practice

As a result of Lehman Brothers bankruptcy and other similar significant events in the financial sector, Troutman Sanders is leveraging its institutional knowledge to assist clients in dealing with the potential and actual insolvency of their energy trading counterparties.

Troutman Sanders has prepared a complimentary tutorial presentation on the topic of counterparty insolvency that includes:

- A useful guide to navigating through this scenario;
- Assistance for clients performing an analysis of the options available to them as the non-insolvent party;
- Recommendations for in-house legal counsel, credit, contracts administration departments; and
- Guidance on the type of numbers to run and other factors necessary to calculate and evaluate exposures in determining whether or not to terminate contracts.

If you believe that a presentation featuring guidance on these topics would be useful to you and your business, please contact john.varholy@troutmansanders.com who will be happy to send you a complimentary copy.
